**Fast and smooth scanning. Intuitive operation. Guided workflows.  
Great software. Made in Germany. Made by ZEISS. Made for you.**

**ZEISS T-SCAN hawk 2  
Take it. Make it.**

# The tool to get about anything done

# Handheld precision, developed and produced by ZEISS

The portable T-SCAN hawk 2, the next-generation lightweight 3D laser scanner, comes with metrology-grade precision and remarkable ease of use.

Developed and produced  
**in Germany.**

Acceptance testing is  
certified for the highest  
industry standards.

# Your perfect working distance

Control your working distance with a new projection mode – a red laser marker helps you to easily adjust for perfect scanning results.

# A solution that adapts to your workflow

The flow is yours – T-SCAN hawk 2 is intuitive to operate and adapts easily to the movement of your hand.

# Introducing the new satellite mode

# Go big with the new satellite mode

T-SCAN hawk 2 is the first portable laser scanner with the new satellite mode to scan objects up to multiple meters. No need for the classical built-in photogrammetry with coded markers. No compromise on accuracy. Easy scanner positioning with the new laser grid.

# The all-in-one software for 3D inspection

T-SCAN hawk 2 operates with GOM Inspect, the well established standard in 3D metrology and part of the ZEISS Quality Suite.  
For 14 days, enjoy your free trial of GOM Inspect Pro.

# CAD modeling with ZEISS Reverse Engineering

Scan 3D data with T-SCAN hawk 2, import it to ZEISS Reverse Engineering and let the software guide you to a high-precision CAD model in just a few steps.

# Controlling quality where it matters

# Reference standards used for system qualification

Carl Zeiss GOM Metrology GmbH is an accredited laboratory in the fields of calibration of length and coordinate standards for optical metrology.

Each T-scan hawk 2 system is delivered with three DAkkS-calibrated, traceable length standards and one DAkkS-calibrated, traceable coordinate standard which are used for system qualification.

# Switching between different tasks

T-SCAN hawk 2 features seamless adjustments for resolution and field of view. Whether small parts, fine details, larger objects or deep pockets, confined spaces or hard-to-reach areas, this 3D laser scanner does the job.

# Operate with a push of a button

T-SCAN hawk 2 features four buttons to start and navigate your workflow directly. No need to operate the software separately on your laptop.

# Strong on dark and shiny surfaces

T-SCAN hawk 2 supports scanning on a wide range of materials and surfaces, delivering 3D measurement data with the highest precision.

# Capturing data wherever you need it

# Everything at hand: Your case for traveling

Whether you take it to production or outside, the 3D laser scanner travels with you in just one case, containing additional tools.

- T-SCAN hawk 2
- Calibration panel
- Hyperscale
- Toolbox
- Reference points
- Power delivery hub

# Made for maintenance

# Ready to take on many applications

Whether it's about finding defects, quality control in production areas or digital twins, reverse engineering, design or the customization of a car: T-SCAN hawk 2 is ready.

# Some tasks to get the job done with ZEISS T-SCAN hawk 2:

## Maintenance

---

3D inspection of dents, corrosion and damage

---

3D scanning and remanufacturing of legacy parts

---

Indoor and outdoor, in rugged and harsh environments

---

Wear monitoring

## Reverse engineering

---

From shape to CAD

---

Archiving tools and cultural heritage

---

Everything from small details to very large repairing of parts

## Quality control

---

Actual comparison with CAD

---

Functional dimensioning

---

Shop floor inspection

---

Reducing the number of iteration in your process

## Design

---

Digitalize complex shapes and physical objects

---

Design modification

---

Interior design

---

3D visualisation

## Industries

---

Automotive

---

Shipping

---

Railway

---

Aerospace

---

Energy generation

---

Oil and gas industry

---

Agriculture, forestry and mining

---

Heavy industry

---

Mold and machine manufacturing

# Technical data

## ZEISS T-SCAN hawk 2

High-speed scanning	Included (multiple blue laser crosses)
Deep pockets	Included (single blue laser line)
Flexible depth of field	Included (on-object distance radar)
Detailed scan	Included
One-shot sensor recalibration	Included (HyperScale)
Large parts	Included (Satellite mode, no coded targets required)
Carbon-fibre lengths standards	Certified (DAKks / ILAC) <sup>(1)</sup>
Volumetric accuracy	0.02mm + 0.015mm/m <sup>(2)</sup>
Laser class (IEC 60825-1:2014)	Class 2 (eye-safe)
Weight	< 1kg
Cable	10m (ultra-light)
Software	ZEISS Quality Suite / GOM Inspect
Full remote workflow	Supported

(1) D-K-21312-01-00 according to DIN EN ISO/IEC17025:2018

(2) Acceptance Test based on ISO 10360
